Content

- What do we want to do?
- Work load?
- Final Result?

What do we want to do?

What do we want to do?

- Develop a QGIS Plugin to semi-automatically derive building blocks (Baublöcke) from official geodata for urban planning and demographic analysis

What do we want to do?

- Develop a QGIS Plugin to semi-automatically derive building blocks (Baublöcke) from official geodata for urban planning and demographic analysis
- Key challenges:
 - Existing ArcGIS Plugin, what needs to be done for QGIS?
 - User-friendly GUI
 - Implement equivalent features in QGIS using PyQGIS API

Work Load?

Work Load?

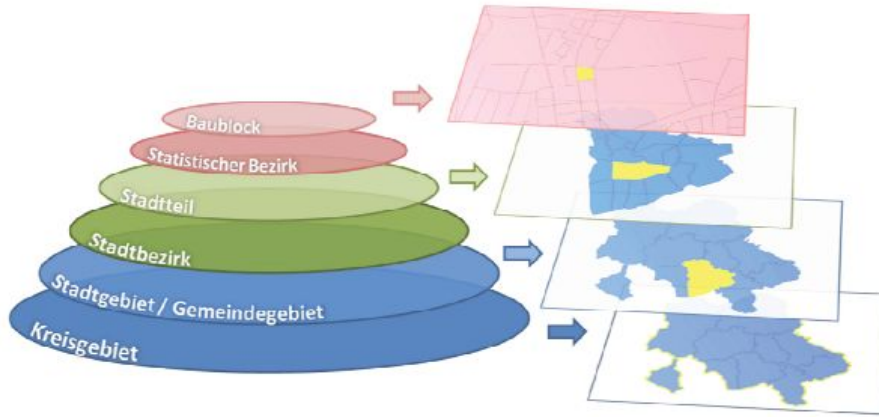

- Main part - ArcGIS Plugin convert to QGIS ~ 16h
 - Create user-friendly GUI ~ 4h
 - Debugging ~ 4h

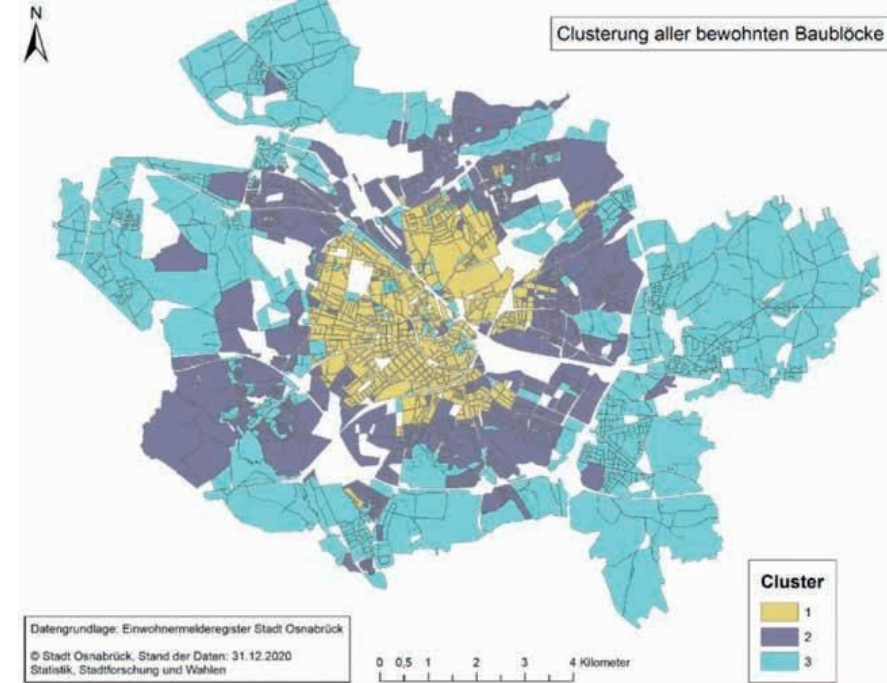

Results?

Final Result
